

Hello, I'm

Natticha Satjawatthana.

I'm a student in the **Super AI Engineer (Season 6)** — one of Thailand's most competitive AI programs — currently looking for an internship. Getting here meant working through rounds of online learning, competitions, and intense team hackathons, where I learned to build under real pressure, tight deadlines, and constant problem-solving. Coming from a mixed background in design, IT, and full-stack web, I've learned to wear many hats and see a system from every side. I'm still exploring where I fit best in AI — and I think that's the exciting part. I learn fast, I'm comfortable saying "I don't know yet, but I'll figure it out," and I'm looking for a place to build, contribute, and grow.
