ABOUT ME

My professional journey began in Graphic Design, but a natural curiosity and the need to adapt led me hands-on into IT Support, where I learned to manage computer equipment and servers. While I do not consider myself an expert in everything, this path has shaped me into a highly adaptable individual with a deep passion for continuous learning. Currently, I am deeply fascinated by Web Development, System Automation, and the world of Artificial Intelligence (particularly LLMs and CNNs). My ultimate goal is to deeply understand, communicate with, and eventually build AI models myself, allowing me to create meaningful projects and stay adaptable for the future. I am highly motivated, always ready to learn, and eager to bring my diverse background into a supportive environment where I can grow and contribute steadily.

TECH PORTFOLIO

SKILLS

WEB & DEVELOPMENT

Python, Django, Vue.js, WordPress, E-commerce, API Integration, Basic Automation & Bots

AI TOOLS & WORKFLOWS

LLMS & AI CODING:

Cursor, Windsurf, VS Code (Claude Code), ChatGPT, Gemini, Grok. Experienced in AI-assisted development (Vibecoding) and multi-LLM cross-referencing.

COMPUTER VISION & VIDEO AI:

Flow, Higgsfield.ai. Applying computer vision concepts (including CNNs) and generative models.

PERSONAL PROJECTS

(Web Development & Automation)

MINI-ERP System (Smart ERP)

- Web-based comprehensive ERP system for SMEs, integrating Purchasing, Inventory, Sales, Finance, and Document Approvals into a single platform.
- Core Features: PR → PO → GRN with real-time stock updates, Quotation → SO → DO with delivery links, and Master data management.
- Tech Stack: Python, Django 6, DRF, JWT, PostgreSQL, Vue 3, Vite, JavaScript, Tailwind CSS.

SabaiBill (SME Document Management System)

- Developed an all-in-one document management web application for SMEs to seamlessly generate Quotations, Sales Orders, Delivery Orders, and Invoices.
- Features customizable company settings, templates, automated VAT/Discount/WHT calculation, and 1-click document progression with PDF export capabilities.
- Built with robust bilingual support (Thai/English) switchable within the app, supporting dual-language document data entry.
- Tech Stack: JavaScript (React, Node.js) and database definition with Prisma Schema.

CJP Frozen Food (cjpgfrozenfood.co.th)

- Developed a product catalog and request system allowing customers to browse and request quotations or open Purchase Orders (PO).
- Integrated LINE Notify API to set up real-time automated alerts for the admin team whenever a customer submits a new request via the website.
- Yuki Pepper Art

Yuki Pepper Art Store (yukipepper.com)

- Built an e-commerce platform for selling artwork with an automated order notification system via LINE.

Workflow Automation — Parcel tracking (Make.com)

- Designed a Make.com scenario for logistics: LINE watches incoming messages, downloads photo attachments, sends images to an OCR service via HTTP, extracts tracking numbers with the Text parser (pattern matching), logs rows in Google Sheets, and pushes predefined shipping-status messages back to customers on LINE (real-time, “immediately as data arrives”).
- Reduced admin workload from manual keying to a short Snap → Wait → Copy → Send routine while the automation handles recognition, logging, and notifications.
- Stack: Make.com, LINE Messaging API (watch / download / push), Google Sheets, HTTP + OCR API, Make Text parser

SABAIJANG — VIETNAM MARKET EXPANSION (BUSINESS DEVELOPMENT)

- Represented Sabaijang (herbal mint spray & wellness products) at the Vietnam–Thailand Health, Medical, Beauty & Personal Care Products Business Matching event on 7 August 2025, Lotte Hotel, Ho Chi Minh City, organized by DITP.
- Product demand from Vietnamese buyers exceeded available samples, demonstrating strong market potential.
- Held a strategic meeting with the CEO of Saigon Co.op, a leading pioneer in Vietnam’s modern retail system, who expressed willingness to introduce Sabaijang products into the Vietnamese market.
- Met with a physician and owner of an acupuncture and cupping clinic in Hanoi who expressed interest in distributing products and collaborating on Private Label / OEM branding for his clinic and professional network.

DIGITAL MARKETING

Ads Optimization, Social Media Marketing, Campaign Management

DESIGN & MEDIA

Packaging Design, Adobe Creative Suite (Illustrator, Photoshop, Premiere Pro, After Effects),

HARDWARE & IT

PC Assembling & Custom Specs, Hardware/Software Installation, Windows Troubleshooting

PHOTOGRAPHY

DSLR, Digital Camera, Mirrorless Camera, Video Editing

SOFT SKILLS

Working under pressure, Meeting deadlines, Cross-functional communication

EDUCATION —

MAE FAH LUANG UNIVERSITY

Bachelor of Science
(Multimedia Technology and Animation)
School of Information Technology and Communication

VALUEPOINT ACADEMY, PUNE, INDIA

Language Program |
Completed: 2018

— WORK EXPERIENCE

Freelance Web Developer, Digital Marketer & Designer

FREELANCE

Mar 2025 - Present

- Design and develop websites with a strong focus on workflow automation to streamline business operations and reduce manual tasks for clients.
- Provide professional graphic design services, specializing in packaging design and creating engaging digital marketing assets.
- Manage and optimize digital advertising campaigns across various platforms to drive targeted traffic, increase conversions, and maximize client ROI.
- Actively studying and integrating Artificial Intelligence (AI) technologies into daily workflows to continuously improve processes.

CONTENT MODERATOR **TRANSCOSMOS (THAILAND) CO., LTD.**

Oct 2024 - Mar 2025

- Reviewed online videos, content, complaints, and legal notices received from end customers regarding copyright issues.
- Evaluated and updated content on a popular social media platform ensuring compliance with community guidelines.
- Conducted audits of received content and managed sharing for social media uploads.

GRAPHIC DESIGNER **ZEA MANAGEMENT CORPORATION CO., LTD.**

Oct 2024 - Mar 2025

- Planned and strategized content based on marketing goals in collaboration with the marketing team to boost sales and engagement.
- Created and posted engaging visual content tailored to target audiences across various social media platforms.
- Analyzed post-campaign results and feedback to continuously improve content quality.

IT SUPPORT **SIAM HERB PRODUCT CO., LTD.**

2019 - Dec 2021

- Installed, configured, and maintained computer software, hardware, and network systems.
- Troubleshoot and resolved technical issues related to IT infrastructure and company equipment.
- Collaborated internally with teams and externally with clients, preparing detailed coordination reports.

CERTIFICATIONS

- **Huawei Cloud Certified Developer Associate (HCCDA) – AI | Huawei Cloud**
 - Certified in AI development and implementation on Huawei Cloud platforms.
 - Credential ID: HWENDCAIDA266070 (Valid until April 2029).
- **Huawei Cloud Certified Developer Associate (HCCDA) – Tech Essentials | Huawei Cloud**
 - Demonstrated foundational knowledge in cloud computing architecture and tech essentials.
 - Credential ID: HWENDCTEDA821114 (Valid until April 2029).
- **Super AI Engineer Season 6 (Level 2 - Current Participant) | AIAT**
 - Selected for the intensive Level 2 camp (starting May 2026) after passing the Foundation AI (Theory) exam.
- **AI Ready ASEAN Completion | ASEAN Foundation & Google.org**
 - Completed 12 hours of AI learning modules, focusing on Generative AI and prompt engineering.

Practical AI Experience & Hackathons

- **FahMai RAG Hackathon | Super AI Engineer Practice**
 - Successfully implemented a Retrieval-Augmented Generation (RAG) system based on the scoring criteria.
- **Agentic Pipeline Hackathon: 2026 Thai Election OCR Challenge | Super AI Engineer Practice**
 - Developed an AI pipeline utilizing OCR technology for automated data processing.
- **From Data to Insight Hackathon | Super AI Engineer Practice**
 - Applied data analysis and machine learning techniques to extract actionable insights from raw data.
