SCAN · PORTFOLIO

SUMMARY

Data Scientist and AI / ML Engineer, and a 2× hackathon winner on Team Machima (Super AI Engineer S6), with hands-on delivery across machine learning, computer vision, edge AI, agentic LLM systems, and full-stack web. Six years spanning graphic design, IT support, and full-stack development give rare range — building production systems with both a user's and an engineer's eye. Seeking an internship (LV.3) or junior Data Scientist / AI Engineer role.

WORK EXPERIENCE

AI / ML Engineer & Data Scientist 2025 – 2026

Super AI Engineer Season 6 — Team Machima (AIAT)

- Won the **Enterprise Data Agent Showdown** (BOL × NCSA): built an agentic AI + OCR pipeline extracting data from enterprise documents; human-in-the-loop routing reached **95% automation and >99.2% field accuracy**.
- Led the data team to **1st place in Edge-AI Intelligent Transport** (AIAT × NT): labeled **7,900+ images** across 30 classes and optimized PyTorch → ONNX → TensorRT FP16 to **~18 FPS (≈6× speedup)** on Jetson Nano.
- Built a CatBoost demand-forecasting model for **ExpresSo**, achieving **WMAPE 8.85** and outperforming XGBoost (9.23) and ARIMA (18.4) through deep EDA and feature engineering.
- Earned a **Special Award** for WellSense AIoT, an edge-AIoT hydration monitor on Arduino UNO Q with 8 BLE sensors and a live rule-based dashboard (Qualcomm × iMake × Chula Med).

Freelance Web & AI Developer Mar 2025 – Present

Self-employed — Full-stack, e-commerce & automation (live demos on GitHub)

- Built **Smart ERP** for SMEs — PR → PO → GRN with real-time stock, Quotation → SO → DO, and role-based approvals (Django, DRF, JWT, Vue 3, PostgreSQL).
- Developed **SabaiBill**, a bilingual (TH / EN) sales-document app (QT → SO → DO → IV) with automated VAT / WHT and one-click PDF export (React, Node.js, Prisma).
- Automated parcel tracking via LINE → OCR → Google Sheets → auto-reply, cutting handling time from **~4 min to <30 sec (~85%)** with Make.com and the LINE API.

Content Moderator Oct 2024 – Mar 2025

Transcosmos (Thailand)

- Reviewed and classified high-volume user content against detailed guidelines — the human analog of running a production classifier at scale.

Graphic Designer 2021 – 2023

ZEA Management

- Delivered brand, print, and digital design — the visual foundation now applied to every dashboard, data visualization, and UI built.

IT Support 2019 – 2021

Siam Herb Product

- Handled software, hardware, and network setup with methodical debugging of production issues across the organization.

EDUCATION

B.Sc. Multimedia Technology & Animation | Mae Fah Luang University — School of IT & Communication 2021 – 2025

Language Program | ValuePoint Academy, Pune, India 2018

CERTIFICATIONS

- Super AI Engineer S6 — LV.2 · AIAT (in progress)
- TPQI — AI / Cloud Certification (valid to 2029)
- AI Ready ASEAN · ASEAN Foundation × Google.org
- Huawei HCCDA — AI & Tech Essentials
- Data Science Job Simulation · 2026
- English · TOEIC 590 | Thai · Native

SKILLS

Data Science & ML	Python, pandas, NumPy, scikit-learn, XGBoost, CatBoost, SQL, EDA, feature engineering, time-series forecasting, model evaluation
AI · Vision · LLM	PyTorch, YOLO, MobileNetV3, CLIP, TensorRT, ONNX, RAG, vector databases, LangChain, agentic AI, OCR (PaddleOCR), prompt engineering
Web & Backend	Django, DRF, Vue 3, React, Node.js, Prisma, PostgreSQL, Supabase, REST API, JWT
Tools & Edge / IoT	Make.com, LINE API, Google Sheets, Git, Jetson Nano, Arduino UNO Q, BLE, Figma, Adobe Creative Suite
