SUMMARY

Data scientist and AI / ML engineer who ships — and wins. On Team Machima (Super AI Engineer S6) I took **1st place in two hackathons** — an edge-AI transport system (data-team lead, ~18 FPS) and an enterprise data agent (agentic AI + OCR) — plus a CatBoost demand-forecasting model (WMAPE 8.85) and a special-award AIoT wellness device. Six years across graphic design, IT, and full-stack web give me unusual range — I see every system as both a daily **user** and the engineer who **builds** it. Open to internship (LV.3) and junior Data Scientist / AI Engineer roles.

AI / ML HACKATHONS

SUPER AI ENGINEER S6 · 2× WINNER

WINNER Enterprise Data Agent — FahMai Finale

BOL × NCSA · Jun 2026

Won the Enterprise Data Agent Showdown — an **agentic AI + OCR** system extracting data from enterprise documents and answering questions over it, judged on OCR accuracy, system design and cybersecurity. Human-in-the-loop routing: **95% auto / 5% checked, >99.2% field accuracy**.

STACK AGENTIC AI · PADDLEOCR · LLM EXTRACTION · RAG · VECTOR DB · HITL

WINNER Edge AI · Intelligent Transport — Data Team Lead

AIAT × NT

Real-time vehicle detection across 10 live CCTV on Jetson Nano: **7,900+ labeled images** (30 classes), YOLO26 pre-labeling + Roboflow QC. Optimized PyTorch → ONNX → TensorRT FP16 to **~18 FPS (~6× speedup)**.

STACK YOLO26 · MOBILENETV3-S · TENSORRT FP16 · CLIP · ROBOFLOW · JETSON NANO

Demand Forecasting — Expresso

Team of 6

Owned deep EDA + feature engineering (lag / rolling, cyclical calendar, store, KMeans). **CatBoost WMAPE 8.85**, beating XGBoost (9.23) and ARIMA (18.4).

STACK CATBOOST · XGBOOST · ARIMA · PANDAS · TIME-SERIES · KMEANS

SPECIAL AWARD WellSense AIoT · “Sip” Wellness Monitor

Qualcomm × iMake × Chula Med

Judges' Favorite for an edge-AIoT hydration / wellness device on Arduino UNO Q + 8 sensors (BLE): real-time data pipeline, rule-based intelligence engine, and a live LED-matrix GOOD / MID / STOP dashboard.

STACK ARDUINO UNO Q · C++ · PYTHON · BLE · SUPABASE · ULTRASONIC / GYRO / TEMP / EEG SENSORS

FULL-STACK & AUTOMATION

LIVE · GITHUB

Smart ERP (Mini-ERP) for SMEs

Live demo + GitHub

PR → PO → GRN with real-time stock, Quotation → SO → DO with delivery links, and a role-based approval center. **Django 6 · DRF · JWT · PostgreSQL · Vue 3 · Tailwind**

SabaiBill — Document Management

Live demo + GitHub

Sales-document app (QT → SO → DO → IV) with auto VAT / WHT, 1-click PDF export, Thai / English bilingual. **React · Node.js · Prisma · PostgreSQL**

Parcel-Tracking Automation & E-commerce

Make.com

LINE → OCR → parse → Google Sheets → auto-reply; cut per-parcel handling **~4 min → <30 sec (~85%)**. Built live stores (CJP Frozen Food, Yuki Pepper) with LINE API alerts. **Make.com · LINE API**

WORK EXPERIENCE

Freelance Web & AI Developer

Mar 2025 – Present

Build full-stack systems, e-commerce, and OCR / automation pipelines; integrate AI into client workflows.

Content Moderator — Transcosmos (Thailand)

Oct 2024 – Mar 2025

High-volume content review & classification against guidelines — the human analog of running a classifier.

Graphic Designer — ZEA Management

2021 – 2023

Brand, print & digital design — the visual eye I bring to every dashboard and UI.

IT Support — Siam Herb Product

2019 – 2021

Software, hardware & network setup; methodical debugging of production issues.

EDUCATION

B.Sc. Multimedia Technology & Animation | Mae Fah Luang University — IT & Communication

2021 – 2025

Language Program | ValuePoint Academy, Pune, India

2018

CERTIFICATIONS

- Super AI Engineer S6 — LV.2 · AIAT (LV.1 done, LV.2 in progress)
- TPQI — AI / Cloud Certification (valid to Apr 2029)
- AI Ready ASEAN · ASEAN Foundation × Google.org · 2024
- Huawei HCCDA — AI & Tech Essentials
- Data Science Job Simulation · May 2026
- English · TOEIC 590 | Thai · Native

SKILLS

Data Science & ML

Python, pandas, NumPy, scikit-learn, XGBoost, CatBoost, feature engineering, EDA, time-series forecasting, model evaluation

Vision · Edge · IoT

YOLO (YOLO26), MobileNetV3, CLIP, TensorRT, Roboflow, PyTorch → ONNX → TensorRT, Jetson Nano, Arduino UNO Q, C++, BLE, sensors

LLM & Generative AI

RAG, semantic chunking, vector DB, LangChain, agentic pipelines, prompt engineering, OCR (PaddleOCR), HITL

Web & Backend

Django, DRF, Vue 3, React, Node.js, Prisma, PostgreSQL, Supabase, JWT, REST API

Automation, Docs & Design

Make.com, LINE API, Google Sheets, Git, Cursor, Windsurf, Claude Code, Markdown, Adobe Creative Suite, Figma
